

## Manav Joshi Task-2

System Flow diagram of the my medical data app in which I contributed as android developer team member.

We used MVVM architecture for developing the product.

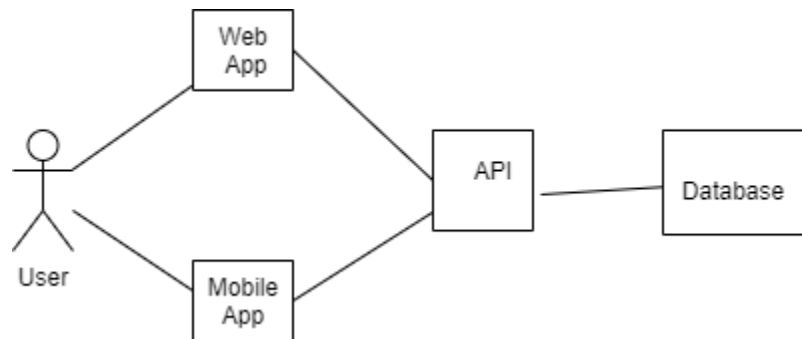

Above is the sequential diagram for the system, it shows how the api is called and if any data is received how it is handled.

Above is the registration module of the application.

Link of the application:-

<https://play.google.com/store/apps/details?id=com.ainotechnology.mymedidata>

Below is the system diagram.

It was a simple system flow.

User interacts with the mobile app, the application calls the API and API is connected to the database.
